Spain-Based 2mProgress to Help ERLAC Students and Alumni Earn Human Resource Management Certifications From HRCI

Demand Continues to Grow Internationally for HRCI Certifications

ALEXANDRIA, Va., September 28, 2018 — Spain-based 2mProgress today announced it will offer certification preparation courses to help students and alumni of the Escuela de Relaciones Laborales de A Coruña (ERLAC) earn credentials from HR Certification Institute® (HRCI®).

[2mProgress](#) and [ERLAC](#) will offer students preparation courses for the Associate Professional in Human Resources – International™ (aPHRi™) certification from HRCI. They join a growing community of universities preparing students for the aPHRi or the U.S.-focused Associate Professional in Human Resources™ (aPHR™) — as part of a capstone course or as a standard part of an HR curriculum. No prior experience is required to be eligible for the [aPHRi](#) or [aPHR](#).

"The aPHRi is perfect for students, those who are new to the HR profession, recent graduates and others seeking career advancement," said HRCI CEO Amy S. Dufrane, Ed.D., SPHR, CAE. "We're excited to see so much new global interest in the development of HR expertise critical for business success."

In August, HRCI announced the availability of the [Spanish-language aPHRi exam](#). Alumni who are established practitioners may also opt to take [Spanish-language exams](#) to earn the Professional in Human Resources – International™ (PHRi™) and the Senior Professional in Human Resources - International™ (SPHRi™) certifications from HRCI.

"ERLAC has the responsibility to educate tomorrow's HR leaders in our region and to respond to the needs of our economy and our social reality," said Iván Vizcaíno Ramos, Director of the Master in Leadership and Management of People program at Universidad de A Coruña. "To do that in an effective way, we have decided to offer our students the preparation they need to take the aPHRi exam. This credential offered by a recognized and respected institution such as HRCI will guarantee that our graduates are conscious of the international concepts that rule over the HR practice worldwide. In addition, all alumni who have the necessary experience, will have the possibility to earn the PHRi and SPHRi through our graduate programs."
